WORK EXPERIENCE

SOFTWARE DEVELOPER - WEBSKITTERS TECHNOLOGY SOLUTIONS PVT LTD | NOVEMBER, 23 - PRESENT

Responsibilities:

- Develop backend services using Node.js, Express, MongoDB, and TypeScript.
- Collaborate on a job portal web application for job seekers and employers, enabling account creation, job posting, job applications, and interview scheduling.
- Integrate third-party services like Stripe for payment processing, employer subscriptions, and Twilio for SMS OTP verification.
- Contribute to a web-based e-commerce platform for selling car spare parts with features like product search, add to cart, checkout, product delivery, and refund management.
- Work on an event management platform based on microservices architecture using Express.js, TypeScript, GraphQL, and Docker.
- Utilize GitLab for version control and team collaboration across all projects.
- Code review and optimization for the speed increase of data fetching.

Projects:

- E-commerce Portal — Car spare parts platform with online sales and payment processing.
- Job Portal — A Recruitment platform connecting employers and job seekers.
- Event Management App — Event planning and management system with microservices setup.

ASSOCIATE DEVELOPER - VYRAZU LABS PVT LTD | APRIL, 22 - NOVEMBER, 23

Responsibilities:

- Designed, developed, and maintained an Insurance CRM system using Laravel, improving customer data management and agent productivity.
- Collaborated with UI/UX designers and QA teams to deliver smooth user experiences and high-quality releases.

Projects:

- Insurance CRM — Web-based CRM for insurance agent and customer data management.
- Task Management System — Kanban-style project and task tracking software.
- HRM Software — HR management platform for automating internal processes.
